

SIGN FAILURE: both arms negative
vs observed +22 (p=non-sig at any dose)

F4: Counterfactual A/B -- both arms fail sign agreement with the +22 observed effect;
glucose arm strongly inverted, wearable arm near-zero null

Both arms fail sign agreement vs +22 observed;
glucose arm inverted (-35), wearable null (-0.21)

Glycemic-state gradient preserved in both arms;
30-50x magnitude difference (crimson vs teal scale)
