

Reproducibly selected held-out exercise examples

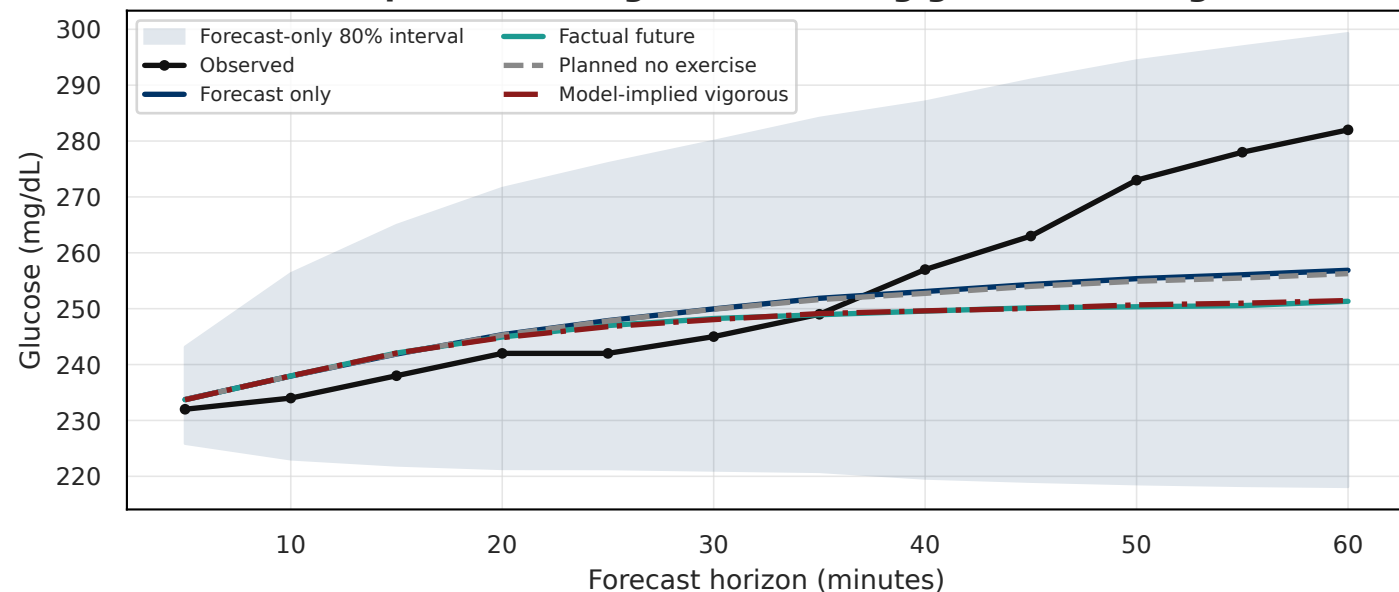

A. In-range, median effect
Participant 4529; moderate; starting glucose 169 mg/dL

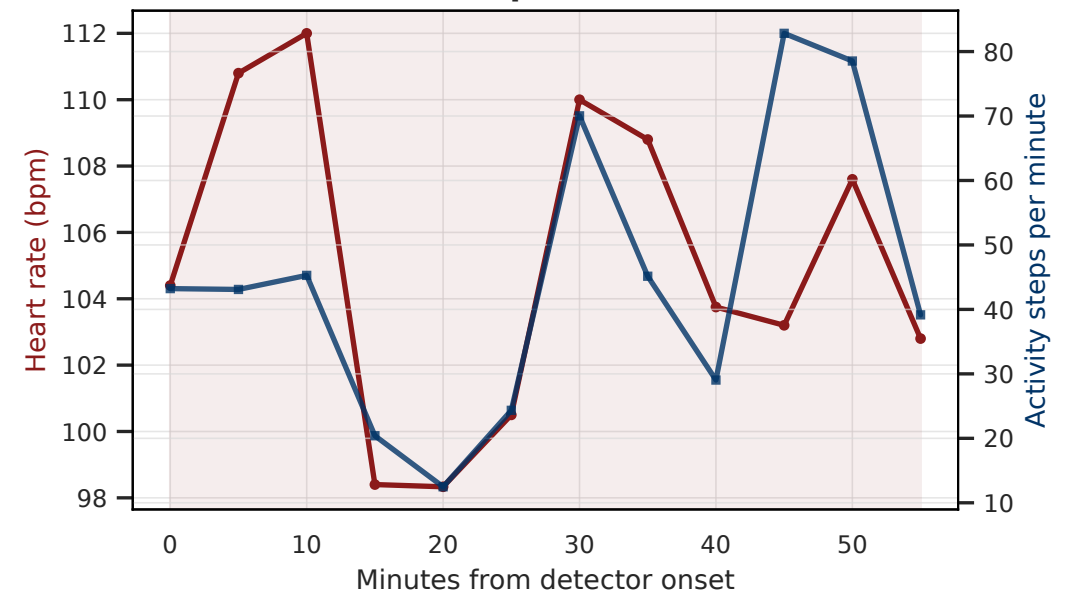

Observed wearable path; active 0 to 55 min

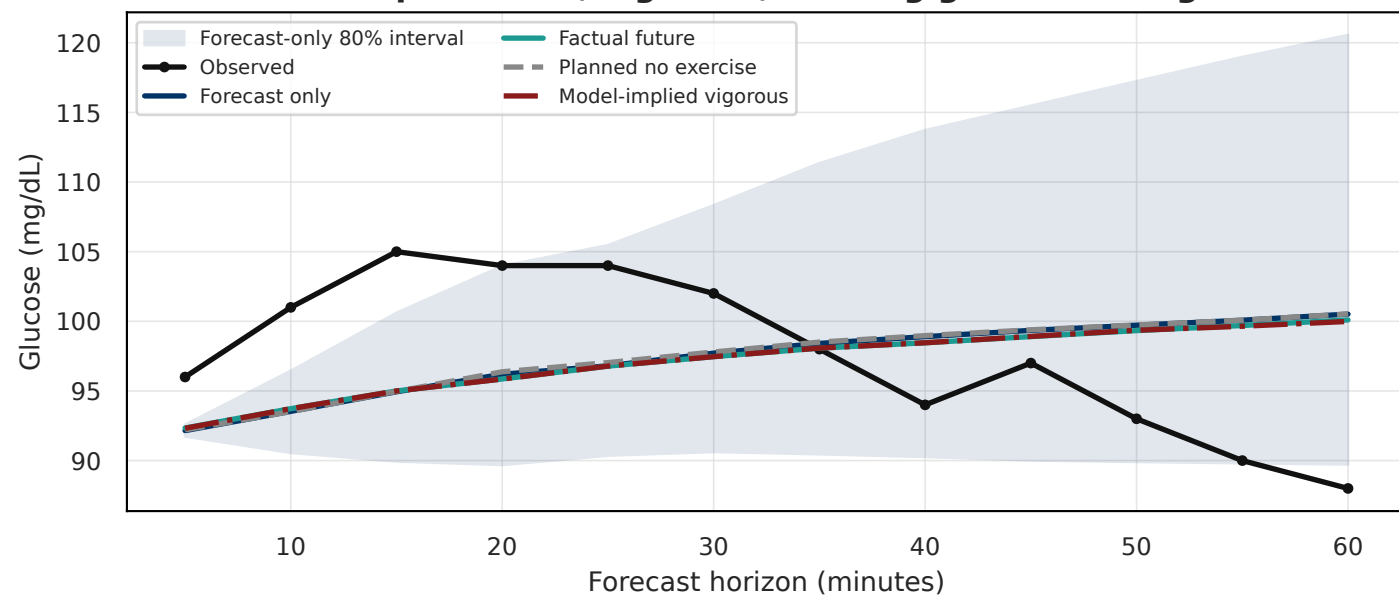

B. High glucose, large negative effect
Participant 1413; vigorous; starting glucose 228 mg/dL

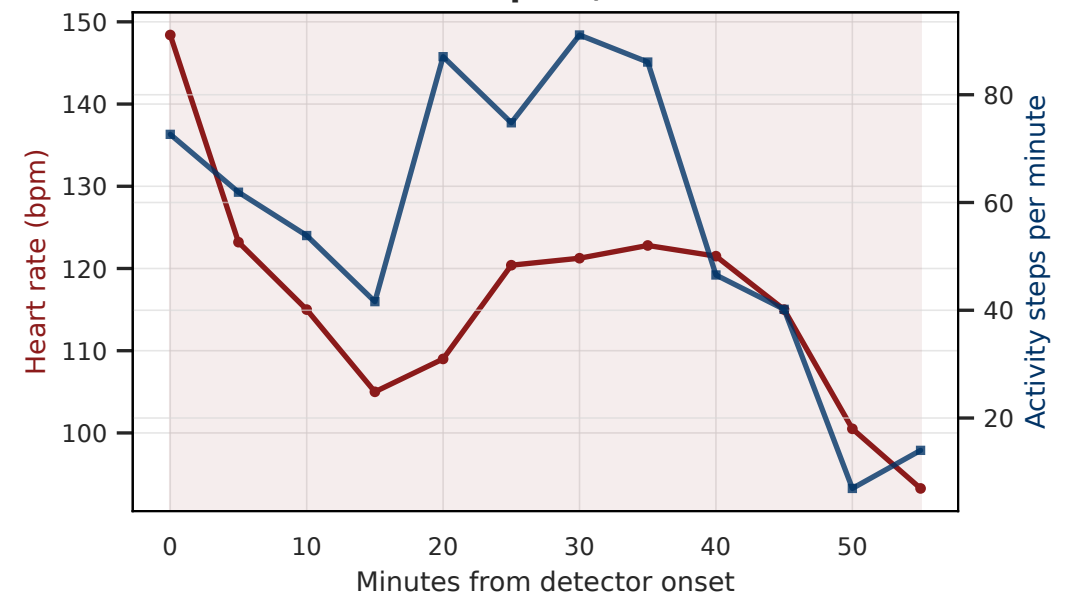

Observed wearable path; active 0 to 55 min

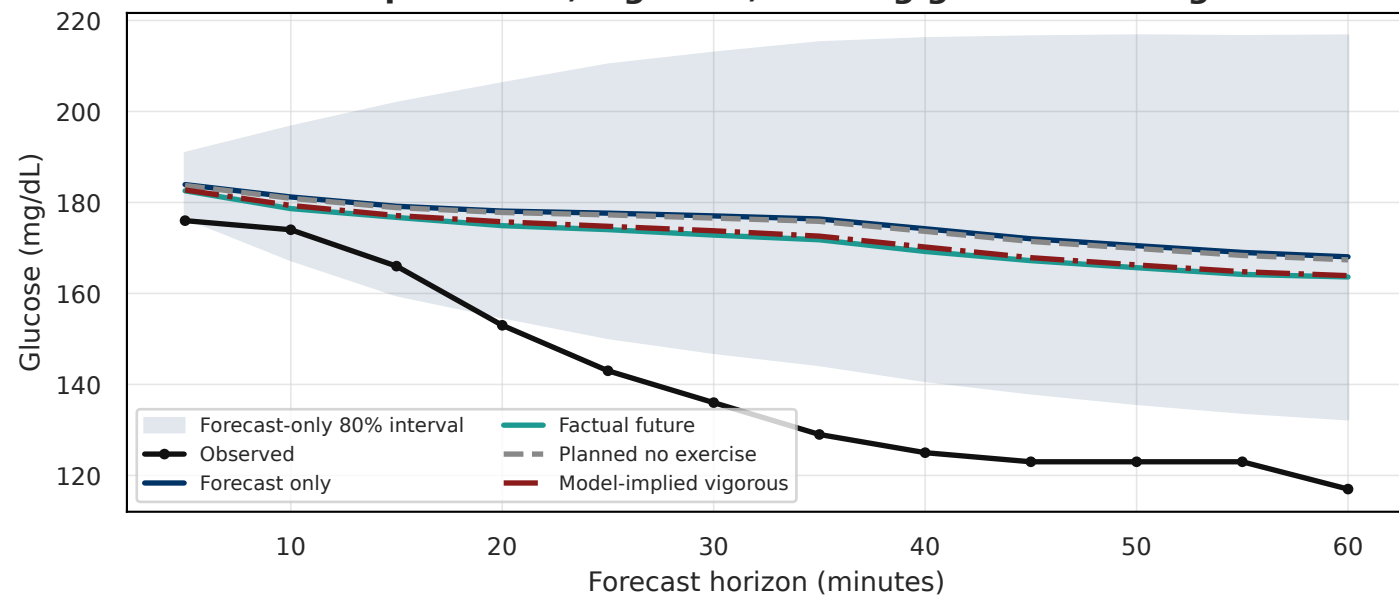

C. Low glucose, smallest effect
Participant 1268; vigorous; starting glucose 94 mg/dL

Observed wearable path; active 0 to 55 min

D. Largest factual forecast improvement
Participant 7364; vigorous; starting glucose 185 mg/dL

Observed wearable path; active 0 to 55 min
